PROFESSIONAL SUMMARY

Security analyst with MSSP experience triaging CrowdStrike Falcon EPP/EDR detections across 1,000+ managed endpoints, investigating phishing, malware, and ransomware incidents, and reducing recurring alert noise. M.S. Cybersecurity graduate with peer-reviewed DFIR research and hands-on experience developing and tuning security detections across endpoint, identity, and cloud telemetry.

SKILLS

Security Operations & Detection: CrowdStrike Falcon EPP/EDR, SIEM, Splunk, Elastic Stack, Splunk SPL, alert triage, incident response, threat hunting, detection development, detection tuning

DFIR & Threat Analysis: MITRE ATT&CK, Sigma, YARA, IOC analysis, Sysmon, Windows Event Logs, Volatility 3, KAPE, Eric Zimmerman Tools, Plaso

Systems & Scripting: Python, PowerShell, Bash, Active Directory, Group Policy, Windows, Linux, Wireshark

Cloud & Infrastructure: AWS, AWS CloudTrail, Azure/Entra ID, Kubernetes

PROFESSIONAL EXPERIENCE

Provost Research Assistant, Digital Forensics (Part-Time)

Sep 2024 – May 2026

Tagliatela College of Engineering, University of New Haven, West Haven, CT

- First author of a peer-reviewed Springer/ICDF2C paper on an LLM- and SHACL-based workflow for generating CASE/UCO-compliant JSON-LD representations of Windows Prefetch, LNK, and Event Log artifacts.
- Co-authored an accepted Elsevier *Forensic Science International: Digital Investigation* paper on the Indicator of Inconsistency Framework; developed Python workflows and SPARQL rules across five anti-forensic scenarios.

Security Support Analyst, Managed Security Services

May 2023 – Mar 2024

Raechal Enterprises Pvt Ltd, Nepal-based MSSP and CrowdStrike Partner, Kathmandu, Nepal

- Triaged CrowdStrike Falcon EPP/EDR detections across 1,000+ managed endpoints, reviewing endpoint telemetry and tuning client-specific policies and exclusions to reduce recurring alert noise.
- Investigated phishing, malware, and ransomware incidents using endpoint telemetry and IOCs to identify affected hosts, determine scope, and support containment and remediation.
- Supported security controls across EDR, MFA, and SIEM environments; identified configuration gaps and communicated investigation findings and remediation recommendations to client IT and management teams.

PROJECTS

Threat Detection & Purple-Team Home Lab

Self-Directed, 2026

- Built a hybrid detection lab spanning Windows AD, Linux, Kubernetes, AWS, and Azure, centralizing endpoint, identity, cloud, and audit telemetry into Splunk and Sumo Logic.
- Executed and investigated 39 attack and discovery scenarios, including Kerberoasting, DCSync, ADOS abuse, credential dumping, and cloud IAM activity; developed and tuned SPL hunting and detection queries across collected telemetry.

SavvyDFIR-MCP: AI-Assisted DFIR Workflows

GitHub

- Built an MCP-based DFIR workflow integrating Volatility 3, Eric Zimmerman Tools, Plaso, Chainsaw, and YARA, with provenance checks linking investigation findings back to source evidence.

Enterprise DFIR Case Investigation

Case Report

- Reconstructed a web-server compromise and data-exfiltration timeline by correlating MFT/USN, EVTX, memory, pagefile, and PCAP evidence across compromised Windows systems; validated key findings through SHA-256 correlation.

EDUCATION

University of New Haven

West Haven, CT

M.S. Cybersecurity, GPA: 3.98

May 2026

Coventry University

UK

B.S. Cybersecurity, First Class Honors, GPA: 3.96

Jun 2023

CERTIFICATIONS

CCNA • Microsoft Azure Fundamentals (AZ-900) • ISC2 Certified in Cybersecurity (CC)
