PROFESSIONAL SUMMARY

Cybersecurity analyst with MSSP experience supporting endpoint security across 9+ client environments and 1,000+ endpoints. Hands-on with CrowdStrike Falcon EPP/EDR deployment, SIEM and MFA integration, detection triage, IOC correlation, phishing and ransomware-precursor investigations, and client reporting. M.S. Cybersecurity graduate with peer-reviewed DFIR research and practical threat-hunting labs.

TECHNICAL SKILLS

Security Operations: Endpoint Detection and Response (EDR), CrowdStrike Falcon EPP/EDR, Security Information and Event Management (SIEM), Splunk, Elastic Stack, alert triage, log analysis, IOC correlation, incident response support, threat hunting, MITRE ATT&CK

Detection Engineering: Splunk SPL, Sigma, YARA, Windows Event Logs, Hayabusa

Digital Forensics: Autopsy, Volatility 3, KAPE, Velociraptor, Eric Zimmerman Tools, Plaso, MFT/USN Journal, EVTX, LNK/Prefetch, timeline analysis, disk and memory forensics

Systems & Automation: Python, PowerShell, Bash, Active Directory, Group Policy, PDQ Deploy, ManageEngine MFA, Git, Linux, Wireshark, tcpdump

Forensic Data: CASE/UCO, SPARQL/RDF, SHACL, JSON-LD, knowledge graphs, LLM-assisted workflows

PROFESSIONAL EXPERIENCE

Provost Research Assistant - Digital Forensics (Part-Time)

Sep 2024 – May 2026

Taghlatela College of Engineering, University of New Haven, West Haven, CT

- First-authored and presented a peer-reviewed Springer/ICDF2C paper evaluating an LLM- and SHACL-based workflow for generating JSON-LD representations compliant with the Cyber-investigation Analysis Standard Expression (CASE) and Unified Cyber Ontology (UCO) for Windows Prefetch, LNK, and Event Log artifacts.
- Co-authored an Elsevier *Forensic Science International: Digital Investigation* journal article introducing the Indicator of Inconsistency Framework; developed Python validation workflows and reusable SPARQL rules evaluated across five anti-forensic scenarios and independent forensic images to characterize false-positive behavior.

Security Support Analyst

May 2023 – Mar 2024

Raechal Enterprises Pvt Ltd, Nepal-based MSSP and CrowdStrike Partner, Kathmandu, Nepal

- Delivered CrowdStrike Falcon EPP/EDR across 9+ client environments totaling 1,000+ endpoints, automating sensor deployment through PDQ Deploy and Group Policy.
- Translated client security requirements and change windows into host groups, prevention-policy settings, and sensor-update schedules; supported banking environments guided by Nepal Rastra Bank requirements and ISO/IEC 27001-aligned controls.
- Integrated Falcon with SIEM environments, deployed ManageEngine MFA, and supported on-site troubleshooting, onboarding, operational handoff, and post-deployment technical reviews.
- Investigated phishing and ransomware-precursor activity using Falcon telemetry; correlated IOCs, documented evidence, and escalated containment recommendations within SLA.

PROJECTS

Threat Detection & Purple-Team Home Lab

Self-Directed, 2026

- Simulated 39 Windows/AD, Azure/AWS, Kubernetes, and Linux attack scenarios; validated SIEM/EDR telemetry and detections using Splunk SPL, Sigma, YARA, Hayabusa, and MITRE ATT&CK.

SavvyDFIR-MCP: AI-Assisted DFIR Workflows

GitHub

- Developing an experimental MCP-based workflow on SANS SIFT that integrates Volatility 3, Eric Zimmerman Tools, Plaso, Chainsaw, and YARA with source-traceable evidence checks and structured reporting.

Enterprise DFIR Case Investigation

Case Report

- Correlated MFT/USN, EVTX, memory, pagefile, and PCAP evidence to reconstruct a web-server compromise and database-exfiltration timeline; documented SHA-256 integrity checks, findings, and remediation priorities.

EDUCATION

Master of Science in Cybersecurity, GPA: 3.98

Aug 2024 – May 2026

University of New Haven, West Haven, CT

Bachelor of Science in Cybersecurity, First Class Honors, GPA: 3.96

May 2020 – Jun 2023

Coventry University, UK

CERTIFICATIONS

Cisco Certified Network Associate (CCNA) • Microsoft Certified: Azure Fundamentals (AZ-900) • ISC2 Certified in Cybersecurity (CC)
