SUMMARY

Cybersecurity graduate with hands-on experience deploying and operationalizing CrowdStrike Falcon EDR across enterprise endpoints, configuring policies, and supporting IT teams through implementation, troubleshooting, and remediation. Experienced scripting in Python, Bash, and PowerShell to automate security workflows and build API-driven integrations. Strong communicator with practice presenting technical findings to both engineering and non-technical stakeholders.

EDUCATION

Master's in Cyber Security (GPA: 3.9) Aug 2024 – Present
University of New Haven, West Haven, CT

Bachelor's in Cyber Security, First Class Honors (GPA: 3.96) May 2020 – Jun 2023
Coventry University, UK

SKILLS

Proficient with: CrowdStrike Falcon EPP/EDR (deployment, policy tuning, alert triage), endpoint security (Windows, Linux, Mac), software deployment (PDQ Deploy, SCCM, Group Policy, PsExec), Python, Bash, PowerShell, Batch, Active Directory, MFA, host-based firewall, vulnerability management, MITRE ATT&CK, NIST CSF

Familiar with: Falcon APIs, Falcon Exposure Management, SIEM (ELK, Splunk, Sentinel, LogScale), DFIR (Autopsy, EZ Tools, KAPE, Velociraptor), Azure (Entra ID/AD, Defender, SSO), AWS, CIS Benchmarks, network defense (Wireshark, tcpdump, Suricata, Snort), penetration testing (Kali Linux, Metasploit, Burp Suite), Docker, AI coding tools (Claude Code, Codex)

Certifications: (ISC)² CC • Cisco CCNA • Microsoft Azure Fundamentals (AZ-900) **CTF:** NCAE CyberGames (forensics, web exploitation, network analysis)

EXPERIENCE

Provost Research Assistant Sep 2024 – Present
Tagliatela College of Engineering, University of New Haven, West Haven, CT

- Engineered Python pipelines (GPT-4/DeepSeek/Gemini) to extract and structure forensic artifacts from MFT, EVTX, LNK, and Office metadata; designed reproducible test harnesses, documented benchmarks, and produced structured findings reports for academic and practitioner audiences.
- Built the Indicator of Inconsistency (IoI) SPARQL framework detecting cross-artifact contradictions across 87M+ RDF triples and 5 antiforensic test scenarios; authored and iterated on technical collateral summarizing methodology and results.

Security Support Analyst May 2023 – Mar 2024
Raechal Enterprise Pvt Ltd, Kathmandu, Nepal

- Deployed CrowdStrike Falcon EPP and EDR across 9+ client environments totaling 1,000+ endpoints using PDQ Deploy and Group Policy; configured Host Groups and Prevention Policies, assisted with SIEM integration, and provided on-site configuration and troubleshooting support.
- Deployed ManageEngine MFA across client environments and assisted with small-scale SIEM configuration; delivered technical presentations on Falcon capabilities to prospective clients and collaborated with the sales team on client acquisition.
- Investigated phishing and ransomware precursor incidents using Falcon telemetry; correlated IOCs, escalated containment guidance, and delivered structured incident reports to technical and management stakeholders within SLA.

PROJECTS

Threat Intelligence Platform In Progress | [Link](#)
Python/Flask app integrating AbuseIPDB, OTX, VirusTotal, and GreyNoise APIs with automated risk scoring, MITRE ATT&CK mapping, and PDF/CSV/JSON export; built to demonstrate Falcon API-style scripting and multi-source integration patterns.

VectorProbe In Progress | [Link](#)
Python tool chaining Nmap, Searchsploit, and enum4linux-ng for automated service discovery, vulnerability correlation, and Markdown report generation; designed for extensibility across additional data sources.

Flamingo Neck Networks Internal Pentest Course Lab | [Link](#)
Executed internal assessment (10.248.1.0/24); chained exploitable CVEs from initial access through full AD domain compromise; delivered 9 findings (2 Critical) with CVSS scoring, remediation priorities, and stakeholder-ready executive summary.

Enterprise DFIR Case Investigation Graduate Final Project | [Link](#)
Led end-to-end investigation of enterprise web-server compromise: correlated MFT/USN, EVTX, Volatility, and PCAP evidence; translated findings into remediation actions and security-posture recommendations.
