

Kismat Kunwar

West Haven, CT — kismatkunwar888@gmail.com — linkedin.com/in/kunwarkismat — Portfolio

SUMMARY

Cybersecurity graduate student with hands-on incident response and digital forensics experience. Published researcher at ICDF2C on applying LLMs to structured representation and mapping of forensic artifacts into CASE/UCO knowledge graphs. Investigated real phishing and ransomware precursor incidents using CrowdStrike EDR. Proficient in Python/Bash; strong communicator with experience presenting findings to technical and non-technical audiences.

EDUCATION

Master’s in Cyber Security (GPA: 3.9) Aug 2024 – Present
University of New Haven, West Haven, CT

Bachelor’s in Cyber Security, First Class Honors (GPA: 3.96) May 2020 – Jun 2023
Coventry University, UK

SKILLS

Proficient with: CrowdStrike Falcon EDR, SIEM (ELK), incident response (NIST SP 800-61, NIST CSF), threat intelligence (MITRE ATT&CK, D3FEND, STIX/TAXII, Cyber Kill Chain, IOC analysis), network defense (Wireshark, tcpdump, Suricata, Snort), DFIR (Autopsy, EZ Tools, CASE/UCO), Python, Bash

Familiar with: Malware analysis, memory forensics, AI coding tools (Claude Code, Codex), Splunk, Sentinel, OSINT (Maltego, VirusTotal, OTX), Azure, AWS, penetration testing (Kali Linux, Metasploit, Burp Suite)

Certifications: (ISC)² CC • Cisco CCNA • Microsoft Azure Fundamentals (AZ-900) **CTF:** NCAE CyberGames (forensics, web exploitation, network analysis)

EXPERIENCE

Provost Research Assistant Sep 2024 – Present
Tagliatela College of Engineering, University of New Haven, West Haven, CT

- Engineered LLM pipelines (GPT-4/DeepSeek/Gemini) to parse unstructured forensic evidence and produce CASE/UCO-compliant knowledge-graph-ready output, cutting manual processing ~30%.
- Built the Indicator of Inconsistency (IoI) Framework, an ontology-driven SPARQL rule library detecting cross-artifact contradictions across MFT, USN journal, event logs, LNK files, and Office metadata; validated against 87M+ RDF triples across 5 antforensic test cases.
- Presented first-author research at ICDF2C on LLM-driven DFIR artifact mapping; delivered findings to academic and practitioner audiences.

Security Support Analyst May 2023 – Mar 2024
Raechal Enterprise Pvt Ltd, Kathmandu, Nepal

- Investigated a credential-harvesting phishing campaign flagged across 3 endpoints; correlated spoofed sender domains, macro-enabled attachment hashes, and O365 login anomalies to confirm compromise; delivered full incident report to senior engineers within 4 hours.
- Triaged a ransomware precursor alert by identifying lateral SMB enumeration and abnormal PowerShell execution on a finance workstation; escalated with IOCs, attack timeline, and containment recommendation before encryption stage was reached.
- Managed ~15 weekly EDR/MFA tickets; tuned Falcon EDR detection policies to reduce false positives, verified endpoint patch compliance, and coordinated change control requests with engineering teams.

PROJECTS

Flamingo Neck Networks Internal Pentest Course Lab
Conducted full-scope internal assessment (10.248.1.0/24): exploited default PostgreSQL credentials for RCE, leveraged guest-to-admin misconfiguration to execute Pass-the-Hash, achieving full AD domain compromise. Documented 9 findings (2 Critical) with CVSS scores, attack chain narrative, and prioritized remediation guidance.

Threat Intelligence Platform In Progress
Flask app aggregating AbuseIPDB, OTX, VirusTotal, and GreyNoise feeds with automated risk scoring, MITRE ATT&CK mapping, and export to PDF/CSV/JSON for analyst reporting workflows.

Malware Research and Development. APT evasion research using C2 frameworks; studied obfuscation, detection bypass, and persistence techniques to inform defensive detection engineering.

VectorProbe (In Progress). Python tool chaining Nmap, Searchsploit, and enum4linux-ng for automated service discovery, vulnerability correlation, and Markdown reporting.
