SUMMARY

Cybersecurity graduate with hands-on experience deploying CrowdStrike Falcon EPP/EDR across enterprise environments, investigating incidents, and delivering technical findings to client stakeholders. Published first-author researcher at ICDF2C on LLM-driven forensic artifact analysis; IoI Framework paper under review at Forensic Science International: Digital Investigation (Elsevier). Proficient in Python, Bash, and PowerShell with a track record of building security tooling and scripting deployment workflows.

EDUCATION

Master's in Cyber Security (GPA: 3.98) Aug 2024 – May 2026
University of New Haven, West Haven, CT

Bachelor's in Cyber Security, First Class Honors (GPA: 3.96) May 2020 – Jun 2023
Coventry University, UK

SKILLS

Proficient with: CrowdStrike Falcon EDR (deployment, policy tuning, alert triage), SIEM (ELK), threat intelligence (MITRE ATT&CK, STIX/TAXII, IOC analysis), software deployment (PDQ Deploy, SCCM, Group Policy), network defense (WireShark, tcpdump, Suricata, Snort), DFIR (Autopsy, EZ Tools, CASE/UCO), Python, Bash, PowerShell, Active Directory, MFA, NIST CSF

Familiar with: Splunk, Sentinel, ManageEngine, Azure (Entra ID, Defender), AWS, penetration testing (Kali Linux, Metasploit, Burp Suite), OSINT (Maltego, VirusTotal, OTX), CIS Benchmarks, AI coding tools (Claude Code, Codex), Docker, Ansible, Terraform, Windows Server, Linux

Certifications: (ISC)² CC • Cisco CCNA • Microsoft Azure Fundamentals (AZ-900) **CTF:** NCAE CyberGames (forensics, web exploitation, network analysis)

EXPERIENCE

Provost Research Assistant Sep 2024 – May 2026
Tagliatela College of Engineering, University of New Haven, West Haven, CT

- Published first-author research at ICDF2C on applying LLMs to structured representation and analysis of forensic artifacts; built the Indicator of Inconsistency (IoI) SPARQL framework validated against 87M+ RDF triples across 5 antiforensic test scenarios, submitted to Forensic Science International: Digital Investigation (Elsevier), currently under review.

Security Support Analyst May 2023 – Mar 2024
Raechal Enterprise Pvt Ltd, Kathmandu, Nepal

- Deployed CrowdStrike Falcon EPP and EDR sensors across 9+ client environments totaling 1,000+ endpoints using PDQ Deploy and Group Policy; configured Host Groups, Prevention Policies (Detect-Only to Block), and sensor update rings; assisted with SIEM integration and on-site configuration support across client visits.
- Deployed ManageEngine MFA across client environments and assisted in standing up small-scale SIEM instances; coordinated configuration, integration with existing tools, and ongoing technical reviews with client IT teams.
- Delivered technical presentations on Falcon platform capabilities to prospective clients; collaborated with the sales team to support client acquisition and onboarding.
- Investigated phishing and ransomware precursor incidents using Falcon telemetry; correlated IOCs, escalated containment guidance, and delivered structured incident reports to technical and management stakeholders within SLA.

PROJECTS

Enterprise DFIR Case Investigation Graduate Final Project | [Link](#)
Led end-to-end incident investigation for enterprise web-server compromise: correlated MFT/USN, EVTX, Volatility, and PCAP evidence to validate intrusion scope and exfiltration activity, then translated findings into remediation actions and security-posture recommendations.

UNC5537 Snowflake Threat Campaign Threat Intelligence Case Study | [Link](#)
Analyzed 165+ breach campaign linked to infostealer credentials and weak MFA controls; mapped adversary behavior to MITRE ATT&CK, documented IOCs, and produced prioritized hardening recommendations aligned to CIS Controls.

Flamingo Neck Networks Internal Pentest Course Lab | [Link](#)
Executed internal assessment (10.248.1.0/24) to identify exploitable control gaps, validate risk through chained attack paths, and deliver 9 findings (2 Critical) with CVSS scoring, remediation priorities, and stakeholder-ready summary reporting.

Threat Intelligence Platform (In Progress). Flask app aggregating AbuseIPDB, OTX, VirusTotal, and GreyNoise with automated risk scoring, MITRE ATT&CK mapping, and PDF/CSV/JSON export. [Link](#)

VectorProbe (In Progress). Python tool chaining Nmap, Searchsploit, and enum4linux-ng for automated service discovery, vulnerability correlation, and Markdown report generation. [Link](#)
